

## PRO-NDC-1E

### NMEA 0183 INTELLIGENT MULTIPLEXER

The Actisense NMEA 0183 Multiplexer(PRO-NDC-1E) is a Type Approved (pending), intelligent and robust platform that cures many interconnectivity headaches.

Introducing the Actisense® PRO-NDC-1E, the intelligent, Type Approved (pending) PRO range multiplexer.

The PRO-NDC-1E is reliable, robust and provides industry leading isolation on all inputs and outputs as standard, so that connected devices safely avoid hazardous ground loops, the number one cause of product failure in NMEA 0183 networks.

The five NMEA 0183 inputs can be routed to either of the two NMEA 0183 outputs, providing a highly customisable network. A bi-directional serial port and an Ethernet port allow for simple configuration and diagnostics using Actisense software.

The configuration tool is accessible via any popular web browser (using the Ethernet port) so there are no PC operating system

compatibility issues to contend with. Using the web based configuration tool will allow the user to finely tune the exact data available on each output. The default setup is for all data to go to all outputs.

2-part pluggable rising clamp connectors on the PRO-NDC-1E means that new devices can easily be connected without the need to remove the unit from its mounted location.

A professional DIN rail mounting kit (sold seperately) keeps the PRO-NDC-1E secure in high vibration environments. Helpful LEDs indicate power, data in, data out and the alarm status to aid diagnostics.
